(Metro Health provides backbone support for ESEHA)
90-90-90

90% of people with HIV are diagnosed
2016 and 2017: 86% (CDC)

90% of people who are diagnosed are in care
2016: 72% (ARIES / Ryan White TGA)
2017: 72% (DSHS / Bexar County)

90% of people in care are virally suppressed
2016: 85% (ARIES / Ryan White TGA)
2017: 86% (DSHS / Bexar County)

Data from DSHS Enhanced HIV/AIDS Reporting System pulled on July 3, 2018
At Least One Visit: Medical visit, ART prescription, VL test, or CD4 test in 2017

Retained in Care: At least 2 visits or labs, at least 3 months apart, or suppressed at end of 2017

Achieved Viral Suppression: Last viral load test value of 2017 was \( \leq 200 \) copies/mL.

Data from DSHS Enhanced HIV/AIDS Reporting System pulled on July 3, 2018
90% DIAGNOSED

Goal: Increase PrEP providers
Result: 18 PrEP locations
(most recently, Project H.O.T.)

- **Barriers to access**: knowledge, financial, geography, stigma, lack of LGBT-friendly providers
- **One year into wider PrEP access**:  
  - Are we at capacity?  
  - What are our biggest remaining challenges?  
  - How do we plan to address?  
  - What about PEP?
90% DIAGNOSED

Goal: Increase testing in emergency departments and jails/detention centers/specialty courts

Result: In talks with 2 hospital systems and with Bexar County Jail...nothing to announce yet

BCJ tentatively scheduled to attend next ESEHA meeting
90% IN CARE (APR. 1-JUN. 30)

Goal: Interval until first appointment with a medical provider is less than 7 days by May 2019

Time until first contact with *any service provider* (ARIES)

6 days (113 clients)
90% IN CARE (APR. 1-JUN. 30)

Goal: Interval until first appointment with a medical provider is less than 7 days by May 2019

Time until first contact with *any service provider* (ARIES)
- 6 days (113 clients)

Time until first appointment with *medical provider* (5 agencies)
- New: 17.4 days (37 clients)
- Relinkage: 23 days (33 clients)

Ranges: 2 to 54 days for new diagnoses; 11 to 108 days for relinkages
90% UNDETECTABLE (VL < 200)

ARIES (2017) 3878 clients
85%

DSHS (2017) 86%

Medicaid, ELR, ARIES, ADAP & private payers; 3919 clients

CMT (2017-2018) 83%
2 clinics, 1877 clients
PEER MENTORING

• A group of about 13 being trained

• Working group of 6 already trained, creating infrastructure

Goal: Support 50-60 newly diagnosed individuals by May 2019, by providing 1-2 contacts via phone and face-to-face contact within one month of referral dates
90% UNDETECTABLE: HOUSING
STIGMA & ADVOCACY

- **Forum Theatre** (8 venues, 240 attendees)
- **ADAP letter/DSHS meeting** (in progress)
- **Health Justice Youth Council** (ongoing)
  - Art + Activism event Oct. 20, 2-5 PM at Say Sí. Metric: Percent who stay engaged by attending/hosting other events/meetings, goal 5%-10%
  - Leadership development: 2 students will attend HIV/STD conference and HIV advocacy day
- **Revisit groups from listening tour** (need to start planning)
- Unified messaging during ACA open enrollment

FEEDBACK ON QUARTERLY UPDATE

- Content
- Enough time for discussion, too little, too much?
- Timing in relation to ESEHA meeting
