FAST-TRACK CITIES:
ENDING THE AIDS EPIDEMIC

Cities achieving the 90–90–90 targets

90% of people living with HIV knowing their HIV status

90% of people who know their HIV-positive status on treatment

90% of people on treatment with suppressed viral loads
WE, THE MAYORS, COMMIT TO:

1. End the AIDS epidemic in cities by 2030

We commit to achieve the 90-90-90 and other Fast-Track targets, which will put us firmly on the path to ending the AIDS, tuberculosis and viral hepatitis epidemics by 2030. We commit to provide sustained access to quality HIV testing, treatment and prevention services, including pre-exposure prophylaxis (PrEP), in support of a comprehensive approach to ending AIDS that also addresses tuberculosis, viral hepatitis, sexually transmitted infections, mental health, substance use disorders, and comorbidities associated with aging with HIV. We will eliminate HIV-related stigma and discrimination.

2. Put people at the centre of everything we do

We will focus our efforts on all people who are vulnerable to HIV, tuberculosis, viral hepatitis and other diseases. We will help to realize and respect the human rights of all affected people and leave no one behind in our city’s AIDS, tuberculosis and viral hepatitis response. We will meaningfully include people living with

3. Address the causes of risk, vulnerability and transmission

We will use all means, including municipal ordinances, policies and programmes, to address factors that make people vulnerable to HIV and other diseases, including laws that discriminate against or criminalize key populations. We will ensure that people affected by HIV enjoy equal participation in civil, political, social, economic and cultural life, free from prejudice, stigma, discrimination, violence or persecution. We will work closely with communities, clinical and service providers, law enforcement and other partners, and with marginalized and vulnerable populations, including sex workers, young people, transgender people, people who use drugs, gay men and other men who have sex with men and transgender people, to foster social equity.

4. Use our AIDS response for positive social transformation

Our leadership will leverage innovative social transformation to build societies that are equitable, inclusive, responsive, resilient and sustainable. We will integrate

HIV in decision-making around policies and programmes that affect their lives. We will work in partnership with our communities to galvanize global support for healthy and resilient societies and for sustainable development.
5. Build and accelerate an appropriate response reflecting local needs

We will develop and promote services that are innovative, safe, accessible, equitable and free from stigma and discrimination. We will encourage and foster community leadership to build demand for, and to deliver, quality services that are responsive to local needs.

6. Mobilize resources for integrated public health and sustainable development

Investing in the AIDS response together with a strong commitment to public health and sustainable development is a sound investment in the future of our city that will yield increased productivity, shared prosperity and the overall well-being of our citizens. We will adapt our city plans and resources for a Fast-Track response to HIV, tuberculosis, viral hepatitis and other diseases within the context of an integrated public health approach. We will develop innovative funding strategies and mobilize additional resources to end the AIDS epidemic by 2030.
